

E-LINEMK

Busbar Systems 100-160-225 A

E-LINEMK

►► General Characteristics

The E-Line MK prefabricated busbar trunking system is used as a vertical and horizontal electrical energy distribution system in premises where there is a need for distribution of energy with ratings of 100A-160A-225A. The busbar housing is manufactured from RAL 7038 epoxy painted galvanized sheet metal.

Broken Nut

Special Block Joint

Thanks to the double-head nut, the need for a torque wrench is eliminated. Since the first head of the nut tightened with an ordinary wrench is automatically broken. The first head of the nut will be broken at 20Nm.

Personell Safety

When either the tapping outlet dust cover, or the tapping box is de-energised (Lid open) the minimum degree of protection IP2X is maintained. This preventing accidental contact with live contacts.

Tin Plated Joint Contacts

Busbar joint contacts are tin plated. The tin plating reduce contact resistance and eliminates overheatings at contact points.

Hinged and Locked IP55 Covers

Tap-off points are protected by IP55 covers againsts water and dust. These covers are fixed to the busbar housing by hinges and single point locker system.

Self-Extinguishing Material for Tap-off Boxes

Tap-off Boxes are manufactured of selfextinguishing (UL V0) and halogen-free plastic material.

Posibility to get up to 80A energy by using tap-off boxes. Interlock mechanism cuts the energy before opening the lid. Tap-off boxes can be installed safely and easily without additional tool.

10 Current Feeding Windows of Every Length

Provision of a total of 10 Plug-in tapping points on both sides of the busbar are provided as a standard feature.

Plug-in Points

Conductor Configuration

E-Line MK allows application of conductor configurations with options below.

- a- 4 Conductor..... : L1,L2,L3,N,PE(Housing)
- b- 5 Conductor..... : L1,L2,L3,N,PE,PE(Housing)
- c- 5 Conductor clean earth : L1,L2,L3,N,CPE,PE(Housing)

Special Flexible Elbows and Expansion Modules

Vertical and horizontal elbow and dilatation modules are solved by using a single module. Horizontal or vertical elbows at desired angle can be easily accomplished. They are also used safety at the passages of buildings, thanks to their flexibility in every direction.

Full Size Tin Plated Conductors

Copper and aluminium conductors are protected againsts corrosion by continous tin plating at entire length. This application increase the life time of conductors and reduce contact resistances.

Fast and Easy Mounting

The mounting of units does not require any special expertise. Depending on the structure and shape of the building, all necessary accessories can be easily mounted either to the ceiling or wall. "Fast and Easy Mounting" means rapid commissioning of the system.

	5	MKP 6355-D Tap-Off Box	L1, L2, L3, N, PE+Housing	D02 Type	3024631
	5	MKP 6357-D Tap-Off Box	L1, L2, L3, N, CPE, PE(Housing)	Fuse Base	3024630

• Maximum size of outgoing cable Ø22 mm. • As standard with 3x63A D02 type fuse base is used in boxes. For output boxes with plug, please contact our company.

Warning: For balancing phase loads, please calculate and select the correct tap-off box types and quantities.

Standard Tap-Off Boxes (EMPTY)

Current(A)	Conductors	Description	Configuration	Device	Code
80	4	MKP 8054-B Tap-Off Box	L1, L2, L3, N, PE(Housing)	Suitable for MCB/Fuse holder	3024718
	5	MKP 8055-B Tap-Off Box	L1, L2, L3, N, PE+Housing		3024717
	5	MKP 8057-B Tap-Off Box	L1, L2, L3, N, CPE, PE(Housing)		3024716

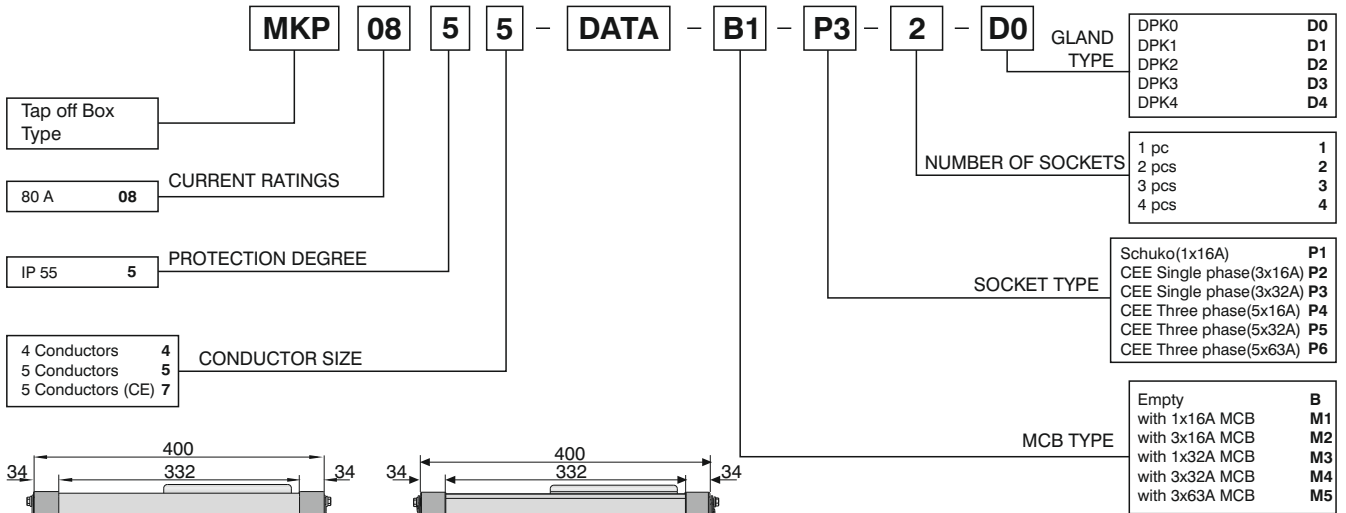

Standard Tap-Off Boxes (MCB)

Current(A)	Conductors	Description	Configuration	Device	Code
80	4	MKP 8054-M Tap-Off Box	L1, L2, L3, N, PE(Housing)	3 x 80A with MCB	3024659
	5	MKP 8055-M Tap-Off Box	L1, L2, L3, N, PE+Housing		3024658
	5	MKP 8057-M Tap-Off Box	L1, L2, L3, N, CPE, PE(Housing)		3024657

- As standard with 3x80A MCB.
- Maximum size of outgoing cable Ø22 mm.

Tap-off boxes with sockets are supplied with 80A MCB as standard. For the tap-off boxes with sockets, please contact to supplier.
Warning: For balancing phase loads, please calculate and select the correct tap-off box types and quantities.

▶▶ Tap off Boxes (MKP-DATA) (80A)

Features;

- Up to 80A MCB
- RAL 7038 Painted Aluminium Housing
- Standard tap-off is empty, gland plates are DPK0.
- with DIN rail inside(available for 4pcs 3P MCB)
- May be equipped with CEE or Schuko Sockets with different configurations. (Optional)
- All tap off boxes with equipment fitted are manufactured with C Type ABB MCB.

Cable Gland Plates

Mat.	Cable Gland Type	Order Code	Inner Diameter (mm)
Al	----	DPK0	---
Al	M16	DPK1	10
Al	10xM16	DPK2	10
Al	M25	DPK3	18
Al	4xM25	DPK4	18

Standard Tap-Off Boxes (EMPTY)

Current(A)	Conductors	Description	Configuration	Device	Code
80	4	MKP 8054-DATA-B1 Tap-off Box	L1, L2, L3, N, PE(Housing)	Suitable for MCB	3046458
	5	MKP 8055-DATA-B1 Tap-off Box	L1, L2, L3, N, PE+Housing		3043818
	5	MKP 8057-DATA-B1 Tap-off Box	L1, L2, L3, N, CPE, PE(Housing)		3063567

- Maximum size of outgoing cable Ø22 mm.
- For non-standard output boxes, please contact our company.

For the tap-off boxes with sockets and MCB, please contact to supplier.

Note: For balancing phase loads, please calculate and select the correct tap-off box types and quantities.

Vertical Shaft Installation

Remove the protective plastic cover.
(These covers are for transportation purpose and required number of covers should be used as END CLOSER unit.)

Alligne two busbars like the picture-2a and insert the busbar conductors into the block joint.

Tighten the bolts of rear cover. (3a)

Tighten the main bolt until the first nut is broken. (4a)

Attach the cable, which has a cross section suitable to the switch current, before you install the box to the busbar.

When the tap-off box cover is at open position; locate the box contacts to the busbar plug area by aligning them.

Be sure that the retaining springs are attached to the busbar

When closing the cover of the box; insert the safety-tongue into the seat by finger touch.

Lock the cover lock by pressing it towards the arrow direction.

Take cover box with lock for safety.

- Empty tap-off boxes are produced with MCB connection cables.
- When the tap-off boxes are used as single phase, the switch will be connected to one of the phase cables.
- Remaining phase cables should be insulated by using cable terminals for your safety. In order to balance phases of busbar, connected loads to the tap off boxes should be calculated carefully.

1- Remove the cover screws.

2- Open the cover.

3- Connect a cable, which has suitable cross section, to the switch, before you install the box to the busbar.

4- Tighten the removed cover screws.

5- Fix the box contacts to the busbar plug area by aligning them.

6- Be sure that, the box is fixed to the busbar properly.

7

- Empty tap-off boxes are produced with MCB connection cables.
- When the tap-off boxes are used as single phase, the switch will be connected to one of the phase cables. Remaining phase cables should be insulated by using cable terminals for your safety.
- In order to balance phases of busbar, connected loads to the tap off boxes should be calculated carefully.

CE DECLARATION OF CONFORMITY

Product Group E-Line MK Busbar Energy Distribution System

Manufacturer EAE Elektrik Asansor End. Insaat San. ve Tic. A.S.
Akcaburgaz Mahallesi, 3114. Sokak,
No:10 34522 Esenyurt-Istanbul

The objects of the declaration described below is in conformity with the relevant Union harmonisation legislation. This declaration of conformity is issued under the sole responsibility of the manufacturer.

Standard :**EN 61439-6**

Low-voltage switchgear and controlgear assemblies - Part 6: Busbar trunking systems

IEC 61439-6

Low-voltage switchgear and controlgear assemblies - Part 6: Busbar trunking systems (busways)

CE - Directive

2014/35/EU "The Low Voltage Directive"

2014/30/EU "Electromagnetic Compatibility (EMC) Directive"

2011/65/EU "Restriction of the use of certain hazardous substances (RoHS)"

PRODUCT OVERVIEW

(100...225A MK)

- 1- It is imperative that the busbar system be in a nominal current range of 100, 160, 225A Al or 160, 225A Cu.
- 2- The busbar system shall conform to the following phase configuration.
 - a- 4 conductors L1 / L2 / L3 / N / PE(Housing)
 - b- 5 conductors L1 / L2 / L3 / N / PE+Housing
 - c- 5 conductors (with clean earth) L1 / L2 / L3 / N / CPE / PE(Housing)
- 3- The insulation voltage of the busbar shall be 690V.
- 4- The busbar housing shall be of 0,50mm thick epoxy painted galvanized sheet metal. (RAL 7038)
- 5- The Al conductors shall be plated with nickel and then with tin, the Cu conductors shall be plated only with tin. The plating shall be continuous along the conductor.
- 6- The busbar joint shall have a single bolt construction and the nut of main joint bolt shall be a double headed nut, tightened at 20Nm.
- 7- The busbar housing shall be continuously clamped together by roll forming method.
- 8- 10 plug-in windows shall be located on a standard 3m length.
- 9- Busbar and tap off boxes shall be IP55 protection class under normal operation conditions.
- 10- IP protection covers of plug-in points shall be hinged and lockable from single point.
- 11- Tap off boxes up to 16A shall be removed from the busbar before opening their lids.
- 12- The tap off boxes above 16A, shall have the following mechanical and electrical safety features.
 - a- The box shall only be plugged in and removed from the busbar at "OFF" position.
 - b- The energy on the connected load shall be automatically cut, when the box lid is open.
 - c- The tap off box shall comply IP2X requirements, while it is plugged into the busbar and the lid is open.
- 13- All tap off box contacts shall be silver plated.
- 14- Jawed tap off box contacts shall be reinforced by steel springs.
- 15- Busbar systems shall be tested and certified according to IEC 61439-6 by international laboratories.
- 16- Busbar system shall have flexible elbows and expansion units.
- 17- Manufacturing facility of busbar systems shall have ISO 9001 and ISO 14001 certification.
